Current position

Senior Radiation Oncologist since January 1999 and Co Managing Director since 2005
Institut du Cancer Courlancy, Reims - France

- Dr CUTULI is radiation oncologist specialised mainly in Breast Cancer, but also in urological and gynaecological cancers. He studied medicine and oncology in Reims and Paris Universities (3 years in Curie Institute). He was certified in senology by Strasbourg University in 1985.

His main fields of interest include breast conserving treatment, radiotherapy techniques, hormonal therapy, male breast cancer, elderly patients. His recent research focuses essentially on ductal and lobular carcinoma in situ. He was coordinator of three national surveys on infiltrating breast carcinoma (1159 patients treated in 2001-2002 and 1647 patients treated in 2007-2008) and ductal carcinoma in situ (1289 patients treated in 2003-2004). He is also coordinator of several large multicentric studies on lobular carcinoma in situ, male breast cancer, conservative treatment in early breast stage in elderly and breast cancer after Hodgkin's disease. Dr Cutuli was the secretary of the French Breast Cancer society (SFSPM) since 2006 and president since 17/11/2016.

He was also the coordinator and working group Senior Editor of French Guidelines on Breast in situ cancers (published in 2009) and infiltrating invasive Breast cancer update (published in 2012), under direction of INCA (National French Cancer Institute).

He organized in 2010, 2012 and 2014 the national seminar on breast carcinomas in situ in Reims, and co-organized the national French Congress of Senology in Strasbourg in 2010 (on Breast cancer in young women) as well as 6 franco-italian congresses in Trento and Perugia since 2005
